

Business Process Reengineering for Competitive Advantage - 4 Days

Course 381 Overview

- You Will Learn How To**
- Select, organize and implement a business reengineering project using CLAMBRE/UML
 - Achieve competitive advantage by capitalizing on technology opportunities and the application of UML tools
 - Maximize customer satisfaction by matching process design to customer needs
 - Identify typical symptoms of business process dysfunction
 - Redesign workflow and structure successfully within the business
 - Ensure best practice through the application of business patterns
- Course Benefits** Faced with a rapidly changing business environment, organizations are under pressure to effect dramatic performance improvements. Business process reengineering (BPR) improves productivity through redesign, innovation and the enabling power of modern technology. In this course, you gain the critical skills needed to implement BPR within your organization. It provides a use case-driven approach utilizing proven tools and techniques for reengineering key elements of your business.
- Who Should Attend** Business analysts, systems analysts and those who lead or participate in projects that involve simplifying, improving, restructuring, modeling or reengineering key business processes.
- Workshop Course** Workshops and demonstrations, which provide you with key skills of the reengineering process, include:
- Profiling the customer
 - Determining anomalies in worker roles and responsibilities
 - Mapping essential business processes using UML
 - Incorporating business patterns for knowledge reuse
 - Identifying symptoms of process dysfunction
 - Streamlining the organization
 - Establishing the process boundary with UML use case diagrams
 - Describing workflow using UML activity diagrams
 - Eliminating process redundancy
 - Simulating a business process

Business Process Reengineering for Competitive Advantage - 4 Days

Course 381 Outline

Introduction and Overview

The what and why of business process reengineering (BPR)

- Maximizing competitive advantage through radical redesign
- The need for reengineering
- Determining what reengineering is and is not
- Focusing on the business process
- Achieving cost reduction and revenue generation goals

Applying the proven CLAMBRE/UML framework for reengineering

- Modeling standards: UML and BPMN
- Customers vs. stakeholders
- Identifying activities and information structure
- Creative right-brain thinking

Targeting the Customer

Exploring the customer interface

- Expanding customer roles with aggregation
- Refining customer types using generalization
- Establishing an accurate customer profile

Documenting customer values and needs

- Service provision vs. product supply
- Evaluating customer satisfaction: quality, flexibility, speed, cost, service
- Categorizing customer relationships using the PRIDE checklist
- Assessing how effectively the business process meets customer needs

Modeling the Business Process

Pinpointing processes for reengineering

- Uncovering core business processes
- Choosing suitable metrics to assess process performance
- Detecting business process antipatterns
- Presenting findings to senior management

Describing worker roles and responsibilities

- Identifying anomalies in worker roles using cross-reference matrices
- Mapping a business process using UML activity diagrams
- Partitioning activities between roles

Analyzing the Business Process

Detailing business processes

- Selecting appropriate UML tools
- Scoping the process with UML use case diagrams
- Pinpointing key business actors
- Modeling alternative workflows
- Capturing ineffective business activities

Exploring the business structure

- Revisiting organization infrastructure
- Mapping information using class diagrams
- UML business stereotypes
- Designating process architecture with communication diagrams
- Removing restrictive structures

Redesigning the Business Process

Maximizing the benefits of information technology

- Web-enabled technology
- Interaction through social spaces
- Designing future-proof business systems
- Business intelligence solutions
- Enterprise Information Systems

Redefining customer-process boundaries

- Adapting the business process to benefit specific customer types
- Integrating and capitalizing on technology opportunities
- Personalizing the process
- Meeting and exceeding customer expectations

Creating the new process using best business practice

- Incorporating business patterns
- Resolving process anomalies
- Comparing strategic alternatives
- Ensuring durable, reliable information management

Rolling Out the Reengineered Process

- Reeducating the workforce
- Linking metrics with customer satisfaction
- Supporting ongoing process improvement
- Monitoring and measuring results
- Demonstrating success
